

HARSHITA SAXENA

SAP HANA Consultant | SAP Native HANA | SQLScript | Data Modeling | Enterprise Analytics

✉ harshisaxena0610@gmail.com ☎ +91-9532989451 🔗 harshitas96.github.io/Resume

SUMMARY

SAP HANA Consultant with 6+ years of experience delivering enterprise data solutions using SAP Native HANA. Experienced in data modeling, data integration, data governance, metadata management, enterprise analytics, SQLScript/PLSQL development, stakeholder collaboration, and solution design. Proven expertise in building scalable enterprise data platforms, supporting data quality, data validation, and digital transformation initiatives.

PROFESSIONAL EXPERIENCE

SAP HANA Consultant, Infosys

04/2026 – Present

- Work as an SAP HANA and Datasphere Consultant for AGCO, collaborating with business stakeholders to understand requirements and design scalable data models, analytics solutions, and enterprise data platforms supporting business reporting and data governance.
- Perform business requirement analysis, solution design, impact assessment, and functional validation for enhancement requests and production changes.
- Designed and developed SAP Datasphere data models using Data Builder, graphical views, data flows, and transformation flows to integrate SAP HANA and enterprise data sources for reporting and analytics.
- Conduct impact analysis for change requests and recommend optimal solutions aligned with business objectives.
- Collaborate with business stakeholders to identify process improvements, participate in solution design discussions, and provide functional and technical recommendations to address business requirements.
- Performed impact analysis, data validation, automated testing, deployment verification, and release support to ensure data quality and successful production deployments through established DevOps and CI/CD practices.
- Developed SAP Analytics Cloud (SAC) dashboards and analytical reports, enabling business stakeholders to visualize KPIs and derive actionable insights from enterprise data.
- Supported end-to-end delivery of SAP Datasphere and SAP Analytics Cloud (SAC) solutions, including requirements analysis, solution design, automated testing, deployment, CI/CD release activities, production support, and change management across Development, QA, UAT, and Production environments
- Collaborated with cross-functional teams to maintain metadata consistency, support data lifecycle management, and deliver reliable enterprise data solutions.

Technology Lead, Infosys

01/2025 – 03/2026

- Developed and maintained XSJS applications and SAP HANA solutions supporting enterprise reporting, data integration, metadata consistency, and business analytics.
- Developed and enhanced complex CDS Views using joins, associations, calculated fields, aggregations, and annotations to support analytical reporting and business data consumption.
- Integrated CDS-based data models with enterprise reporting solutions and optimized view performance to support efficient data retrieval and analytics.
- Designed and optimized SAP Datasphere data models, SQL-based transformations, and SAP HANA solutions to support enterprise data integration, reporting, and analytics.
- Developed and enhanced complex CDS Views using joins, associations, calculated fields, aggregations, and annotations to support analytical reporting and business data consumption.
- Participated in cloud migration planning and data readiness activities, supporting application assessment, migration strategy, dependency analysis, and evaluation of enterprise data integration requirements.
- Supported Azure cloud migration planning, dependency analysis, DevOps release planning, CI/CD deployment activities, and data readiness assessments for enterprise applications.

Technology Analyst, Infosys

10/2022 – 12/2024

- Delivered SAP HANA and PL/SQL solutions for global enterprise applications, improving system performance and supporting large-scale business operations.
- Optimized SAP HANA models and complex PL/SQL queries, improving transaction processing and data retrieval efficiency by up to 40%.
- Designed and enhanced SAP Datasphere and SAP HANA data models, Calculation Views, and scalable data integration pipelines using SAP SLT and BODS, enabling efficient enterprise reporting and business-critical analytics solutions for Apple.
- Performed data profiling, data validation, and root cause analysis to improve reporting accuracy and maintain enterprise data quality.
- Supported go-live activities, CI/CD deployments, release validation, defect resolution, root cause analysis, and production support to ensure reliable enterprise application delivery.

Senior System Engineer, Infosys

10/2020 – 09/2022

- Supported SAP HANA and PL/SQL-based enterprise applications, improving project delivery efficiency and system reliability.
- Implemented automation and Tableau-based monitoring solutions, reducing manual validation efforts and improving reporting accuracy.
- Performed troubleshooting, debugging, and performance optimization for critical SAP applications, minimizing downtime and operational issues.
- Collaborated with cross-functional teams to resolve technical challenges, enhance data security, and support seamless business operations.

EDUCATION

Bachelor of Technology, PSIT Kanpur

08/2015 – 06/2019

- Specialized in Electronics and Communications with 73 percentile.
- Published patent: *Medicart: Telemetry using RFID* (2018)
- Selected among Top 100 projects in India for India International Science Project.

CORE COMPETENCIES

Functional Consulting

Requirement Gathering, Business Process Analysis, Stakeholder Management, Solution Design, Functional Documentation, UAT Support, Change Request Analysis, Production Support, Agile Delivery, Business Transformation, Incident & Problem Management

SAP & Database Technologies

SAP Datasphere, SAP Native HANA, SAP Analytics Cloud (SAC), CDS Views, SAP BODS, SQL, SQLScript, PL/SQL, Data Warehousing, ETL Integration, Data Integration, Data Lifecycle Management, Performance Tuning

Analytics & AI

SAP Analytics Cloud (SAC), Power BI, Enterprise Analytics, Data Modeling, Data Governance, Data Quality, Data Profiling, Data Validation, Metadata Management, Generative AI, Prompt Engineering

Programming & Tools

Python (Pandas), SQL, Git, Azure DevOps, CI/CD, DevOps, XSJS, JavaScript, Shell Scripting, UNIX

CERTIFICATIONS

- | | | |
|---|---------------------------------------|--------------------------|
| • Consulting Processes, Perspectives and Models | • SAP HANA Basics Consultant | • SAP HANA Professional |
| • Professional PL/SQL Associate | • Google Associate Cloud Engineer | • AWS Cloud Professional |
| • AWS Cloud Beginner | • Database and SQL Professional | • MySQL Associate |
| • Certified Python Associate | • Consultant Certified Unix Associate | • Agile Developer |
| • Open Source Professional | • Open Chain Practitioner | |

AWARDS & HONORS

Innovative Coding Solutions Award – Reduced processing time by 40%

Exceptional Client Satisfaction Award – Achieved 86% client satisfaction

Recipient of Infosys **Business Ninja, Extra Mile, Rising Star, Insta,** and **Glory Awards**
